

# INCLINE STAIR LIFT

SIYAKHULA  
ELEVATORS

## INCLINE STAIR LIFT

The INCLINE STAIR LIFT can be installed onto a straight or curved staircase. The inclined platform stairlift is safe and very simple to operate. Ideally suited to most external or internal environments and with fully automatic barrier arms and a platform that folds to a low profile when not in use, the INCLINE STAIR LIFT allows other stair users to pass with ease.

### SPACE SAVING DESIGN

A compact design is one of our guiding principles. The slim form of our lifts combined with a folding platform ensures your staircase remains free of obstructions.

### PRACTICAL HANDRAIL

The lift is guided along two parallel rails by a set of rollers, whereby the rail is equipped with machined holes where the system runs on. This is a practical and strong system for both indoor and outdoor usage.

### COMFORTABLE OPERATION

The smooth start and stop performance ensures that travel is a pleasant experience; our lifts are low maintenance and their reliability has been proven in everyday life. The operation of the lift is completely battery-operated; the batteries are recharged at the final stations. The lift will automatically switch off after a period of time without use in order to prevent a deep discharge occurring if it has not been properly parked.

The modern touch sensitive membrane controls ensure that even people with reduced physical abilities and motor skills can operate our lifts.

## SMALL FOOTPRINT

**PRODUCT HIGHLIGHTS**

- 1. Safety bars: your well-being is our top priority
- 2. Coloured LED lighting: to further enhance informative movement of the product.
- 3. Graphic display: keeps you fully informed regarding the actual operational status
- 4. Simple, straightforward operation thanks to sensitive membrane button controls.
- 5. The electrically operated folding platform provides maximum comfort with a minimum of obstruction.
- 6. Platform body: can be freely customised with individual colours and designs.

The integrated handrail blends harmoniously into the lift and has allowed us to produce a particularly slim design.

Choose a colour of your platform from our range of RAL colours to seamlessly blend the unit into your building.

The graphic display panel will keep you up-to-date regarding the operating status of your lift and gives practical information and advice.

**INDIVIDUAL PLATFORM CUSTOMISATION**

With the ability to customise the colour of the guide rail and the unit colour this allows the unit to seamlessly blend into the surroundings and allows for you to as the client to have an aesthetically pleasing unit.

## ACCESSORIES, CHOICES, OPTIONS

### LOCKABLE, SECURE WALL MOUNTED REMOTE CONTROL

Ideal for outdoor installations or for use in public buildings.

### PORTABLE HANDHELD REMOTE CONTROL

With a push of the button you can summon the lift to the desired landing.

### SELECTION OF FINISHES

With multiple RAL colours to choose from the client has the ability to choose their own colours.

### OPTIONAL FOLDING SEAT

Will transform your platform lift into a chairlift – particularly useful for people with restricted mobility.

## INSTALLATION EXAMPLES

### PLATFORM LIFTS FOR STRAIGHT AND CURVED STAIRCASES

Intermediate landings can be added with a curved travel rail (Fig. 2) or by installing rails with elevation changes (Fig. 3). The travel rails can be mounted directly onto the walls (Fig 1) or attached to steel stanchions (Fig. 2 & 3). Multi-level landings with parking places can be planned to suit individual requirements.
